**Statement on Senate Approval of  
Dan Glickman as Secretary of  
Agriculture**

*March 30, 1995*

I am pleased the Senate today overwhelmingly voted in support of Dan Glickman as the new Secretary to the Department of Agriculture.

Dan Glickman will be a strong voice and advocate for farmers, working families, and American agriculture.

During the past 2 years, the Agriculture Department has broken new ground on expanding trade opportunities, developing empowerment zones for distressed rural areas, and streamlining a major Federal agency that now runs more efficiently. However, our work is not done, and we must still tackle other important issues facing rural communities, farmers, and ranchers.

Next month will be especially important as we convene in Ames, Iowa, for the National Rural Conference to discuss the development of our Nation's economy, jobs, trade, and preservation of the family farm. It is important to hear firsthand from ordinary Americans, and I am pleased Dan is starting the job with his sleeves rolled up.

**Statement on the Major League  
Baseball Strike**

*March 30, 1995*

For the first time in months there is reason for some optimism for those of us who are hoping for a 1995 baseball season with real major league players.

The players have agreed to return to work if the district court judge issues an injunction. If the judge does grant the injunction, I hope the owners decide to let the players play ball.

In October, in an attempt to assist the parties, we appointed Bill Usery as special mediator with the hope that he could bring the owners and players together at the bargaining table, where ultimately this dispute must be resolved. He has done his best to get that job done and will continue to do so.

As the owners and players meet in these last few days before the scheduled start of the season, I hope they will give it their best shot, that they will bargain in good faith and be flexible and willing to compromise so that America's baseball fans again have a sport they can be proud of.

Like millions of other fans across the country, I want to see the Ripkens, Gwynns, Bonds, Mattinglys, and Cones in uniform on the playing field. We're getting down to the wire. Let's hope the owners and players see the light for the sake of the fans and bring back Major League Baseball.

**Message to the Congress on Science  
and Technology**

*March 29, 1995*

*To the Congress of the United States:*

This Nation's future depends on strong public and private support for science and technology. My Administration's decision to make sound investments in science and technology even as the Federal Government cuts other spending is premised on three basic assumptions:

- Technology is the engine of economic growth.
- Scientific knowledge is the key to the future.
- Responsible government advances science and technology.

The Congress and the American people can find evidence of the Administration's dedication to responsible government support for science and technology in our defense and economic policies as well as our management of the science and technology enterprise. We have decreased the Federal deficit, helped to create millions of new jobs, and improved the tax treatment of small businesses and of investments in research and development. Hemispheric and global trade agreements as well as relaxation of outdated export controls have opened huge export markets to America's high-tech industries. My *National Security Strategy of Engagement and Enlargement* (February 1995) depends on farsighted and efficient science and technology investments. Our foreign policy and security interests are also supported by
